Les avantages de la porcelaine

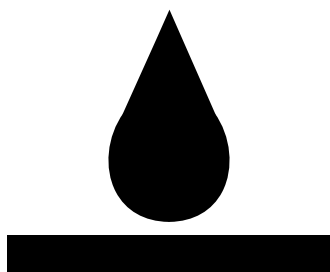

- Ne raye pas et ne se tache pas
- Ne change pas de couleur avec le temps
- Ne nécessite aucun entretien
- Résiste au sel de déglçage, à l'acide et aux produits de nettoyage chimiques
- Résiste aux cycles de gel-dégel
- Antidérapante
- Facile à nettoyer
- Hautement résistante aux charges
- Sans efflorescence

The advantages of porcelain

- Does not scratch or stain
- Colours do not fade over time
- Requires no maintenance
- Resistant to de-icing salt, acid and chemical cleaning products
- Resistant to freeze-thaw cycles
- Anti-slip
- Easy to clean
- Highly resistant to loads
- No efflorescence

Pavés en porcelaine | Porcelain pavers – 6,5 cm

La **collection Lapis** est fabriquée avec une technologie de double chargement en épaisseur **6,5 cm** pour répondre aux besoins des **marquages routiers** et pour résister aux exigences les plus extrêmes dans les contextes urbains. Elle est adaptée aux **boulevards, places** et **allées** soumis à une circulation routière intense et prolongée, ainsi qu'aux **pistes cyclables**, aux **passages** et aux **allées pour piétons**. Résistance, polyvalence, style et fonctionnalité au service des villes contemporaines. | The Lapis collection is produced with double loaded in **6.5 cm** thickness to meet the needs of **road markings** and to withstand the most extreme demands in urban contexts. It is suitable for **boulevards, squares** and **alleys** subject to heavy and prolonged vehicular traffic, as well as **bicycles** and **crosswalks** and **walkways**. Resistance, versatility, style and functionality for contemporary cities.

Plots réglables | Adjustable supports

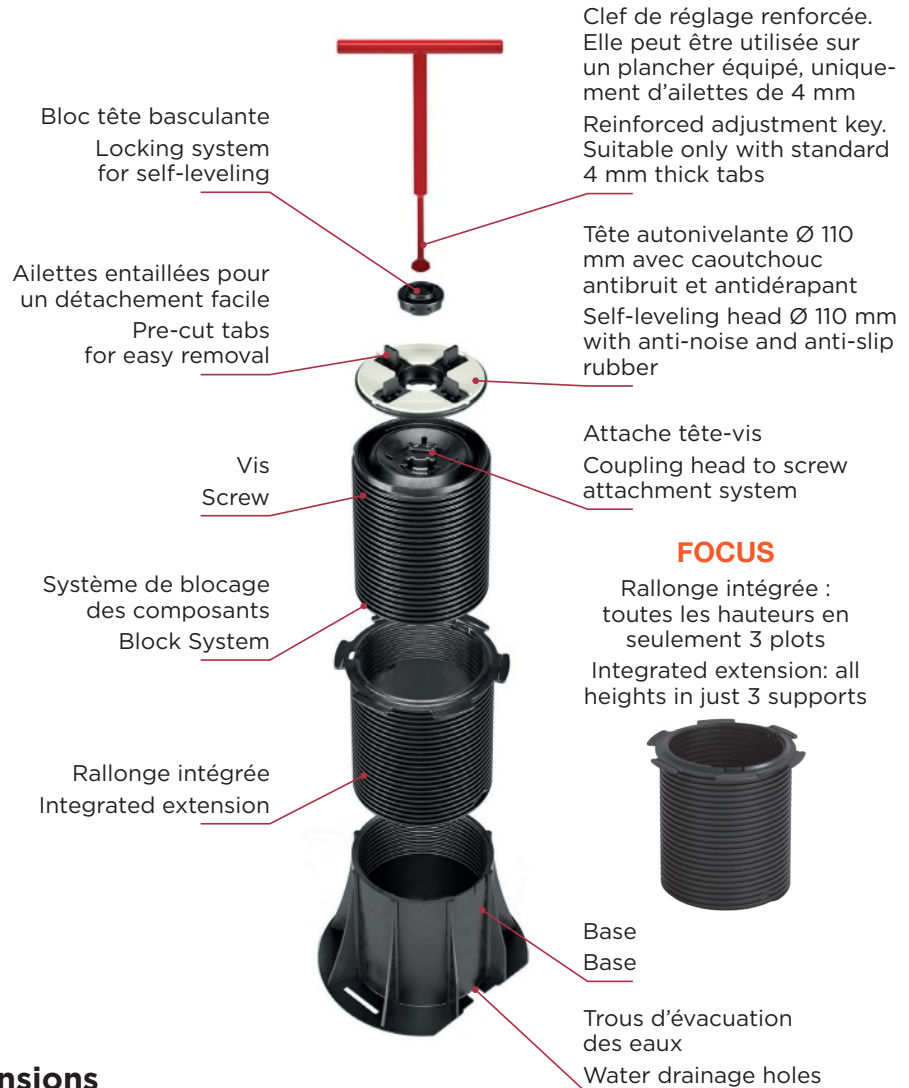

Les **plots réglables Eterno Ivica** offrent de multiples solutions pour compenser les petites imperfections et les grandes pentes de n'importe quel plan de pose, de façon à toujours réaliser des pavements parfaitement stables et à niveau. L'exclusive **clef de réglage**, élément essentiel du système, utilisable pour les plots **Pedestal Prime®**, **Eterno SE** et **New Maxi NM**, permet de régler les plots, et par conséquent le revêtement de sol au-dessus, même lorsque le pavement est terminé, en évitant ainsi de devoir le soulever. | The **Eterno Ivica adjustable height supports** offer multiple solutions to compensate for small imperfections and large gradients of any laying surface so as to always achieve very stable and perfectly flat floors. The unique **adjustment key**, using with **Pedestal Prime®**, **Eterno SE Support** and **New Maxi NM Support**, is an essential element of the system which allows the control of the paver supports (and consequently the floor above) even when the flooring has already been laid, without the need to lift any slab.
